Matt Nattaly, Water Agency Manager  
Santa Barbara County Water Agency  
Applicant for Round 1 of the Proposition 84 Implementation Grant,  
Santa Barbara IRWM Region  
123 East Anapamu  
Santa Barbara, CA 93101-2058

December 15, 2010

RE: Proposition 84-Safe Drinking Water, Water Quality and Supply, Flood Control, River  
and Coastal Protection Bond Act of 2006-Disadvantaged Community (DAC) Support  
Letter

Dear Mr. Nattaly:

It is with great pleasure that the City of Lompoc (City) submits this letter in support of the Lompoc Valley Leak Detection and Repair Project, which is included in the Implementation Grant Application for Round 1 monies under Proposition 84. The City of Lompoc serves as the lead agency for this Project and has partnered with two other water agencies, Mission Hills Community Services District (MHCS D) and Vandenberg Village Community Services District (VVCSD) to provide benefits to the vast majority of the Lompoc Valley. MHCS D and VVCSD will separately fund their respective portions of the project; they respectively provided a letter of support and a Board resolution supporting the project. The City is the only partner, which is designated as a DAC.

The goal of the Lompoc Valley Leak Detection and Repair Project is to reduce water losses in the service areas of the three cooperating entities through water distribution system audits, repair and ongoing monitoring. The City has an extensive water conservation program; however, it has never completed a water distribution audit and repair project for the entire City, due to limited staff and resources. This project allows the City to accomplish this goal and to work with two other water districts in the Lompoc Valley.

This project is of great value to residents of the City and both Districts as well as a benefit to the water resources we use and steward. Apart from the obvious conservation elements of the project, it also benefits the community by providing for regional drought preparedness. Further, citizens will also benefit from increased water supply achieved in the most efficient, cost effective, and reliable manner.

Application for Round 1 of the Proposition 84 Implementation Grant  
Santa Barbara IRWM Region

Sacramento, CA 95814

RE: Proposition 84 – Safe Drinking Water Quality and Supply, Flood Control,  
River and Coastal Protection Bond Act of 2006

To Whom It May Concern:

The City of Santa Maria is very pleased to have the opportunity to participate in the Proposition 84 (Prop 84) Round 1 Implementation Grant Funding Program for the Untreated Water Landscape Irrigation Project.

This project extends an existing irrigation system from the City of Santa Maria's Civic Center to two State and three local public facilities with large landscaped areas. These efforts allow Santa Maria to utilize its abundant groundwater supply from the Santa Maria Groundwater Basin, which is high in nitrates and not usable for domestic supply, through the conversion of old wells and extended pipeline. Currently, the irrigation water is blended with State Water supplies that are more efficiently directed for domestic use.

Project benefits include –

1. Increasing water reuse and conservation to increase and extend the existing water supplies;
2. Improving water supply in the least costly, most efficient and reliable manner;
3. Improving operational efficiency, transfers and supply reliability; and
4. Improves the quality of the groundwater.

These benefits contribute to a disadvantaged community while surrounding jurisdictions benefit from improved water resources from the shared groundwater basin.

Should you have questions, please feel free to contact Teresa Reyburn at (805) 925-0951 ext. 7219.

Sincerely,

LAWRENCE W. APPEL, Director  
Community Development Department

RE: Proposition 84 – Safe Drinking Water Quality and Supply, Flood Control,  
River and Coastal Protection Bond Act of 2006

To Whom It May Concern:

The City of Santa Maria is very pleased to have the opportunity to participate in the Proposition 84 (Prop 84) Round 1 Implementation Grant Funding Program for the Leakwatch Project. The Leakwatch provides real-time meter reading capable of detecting leaks at their inception.

The project involves the installation of new meter registers and transmitters at each water meter which are set up to transmit data back to a central database. It is anticipated that up to 250 AF per year will be conserved annually at full implementation, and operational costs will be reduced by up to \$96,500. The project also will serve as a tool to monitor water conservation tracking requirements in the event of a catastrophic event.

The City of Santa Maria has a long-time history of participating in infrastructure improvements within our disadvantaged community. This project exemplifies the region's progress toward implementing goals in the Santa Barbara County's Integrated Regional Water Management Plan. The City is in full support of this project and has committed a total of \$900,000 over the next two fiscal years.

Should you have questions, please feel free to contact Teresa Reyburn at (805) 925-0951 ext. 7219.

Sincerely,

LAWRENCE W. APPEL, Director  
Community Development Department

RE: Proposition 84—Safe Drinking Water, Water Quality and Supply, Flood Control, River and Coastal Protection Bond Act of 2006

To Whom It May Concern:

It is with great pleasure and optimism that the Redevelopment Agency (RDA) for the City of Goleta submits this letter outlining our support of the San Jose Creek Capacity & Fish Passage Project for consideration of Proposition 84 funding.

Our RDA is investing heavily in public infrastructure improvements in the Old Town area. The San Jose Creek project is truly at the center of these efforts and benefits the residents of our Old Town Redevelopment Project Area. This disadvantaged community will see an immediate public safety benefit through a reduction in potential flooding events as result of these important improvements. Our RDA Board has already budgeted more than \$9 million dollars toward the San Jose Creek Project and looks forward to its completion in 2013.

Should you have any questions or concerns regarding this letter, please contact me at (805) 961-7501.

Sincerely,

Dan Singer  
Executive Director  
Redevelopment Agency for the City of Goleta

RE: Proposition 84—Safe Drinking Water, Water Quality and Supply, Flood Control, River and Coastal Protection Bond Act of 2006

To Whom It May Concern:

The City of Guadalupe is in full support of our Recycled Water Feasibility Study for consideration of Proposition 84 funding. We have committed to providing \$10,644 in matching funds (in-kind) throughout the duration of the project.

The City is currently in the process of upgrading our existing wastewater treatment plant to advanced secondary treatment. A Recycled Water Feasibility Study must be conducted before we are able to make the full upgrade to tertiary treatment.

Furthermore, the Study would provide great benefit by enabling the City to meet its growing water needs. Currently, there are two new housing developments being planned. This increase in residents will further strain our water supply. In addition, as a DAC, our limited funds do not allow us to import additional water from the State Water Project.

If you have any questions or comments, please contact me directly at 805/356-3892 or via email at [rc@ci.guadalupe.ca.us](mailto:rc@ci.guadalupe.ca.us).

Thank you,
